Ishan has examinations in the upcoming week. He is tensed

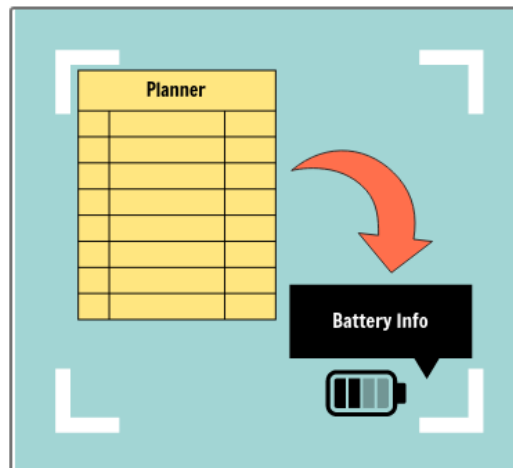

He wakes up and finds that his laptop is discharged. It is frustrating for him as he has a tight schedule in the upcoming week.

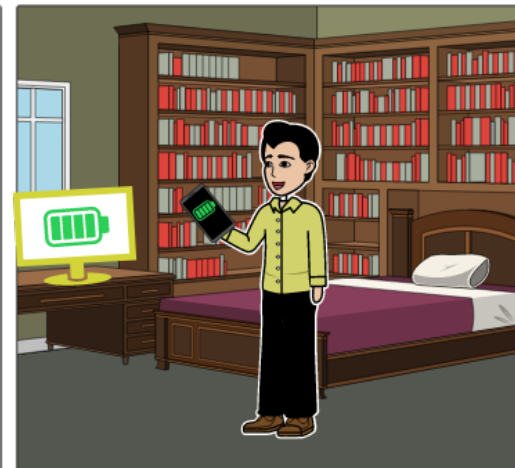

He surfs the web to look for a Device Manager through which he can keep track battery of all his devices

He finds Device Manager app and after installing it he started using it

He schedules his next day in the app and enters details about his devices for the app to suggest him when to charge his devices.

He follows the suggestions. He could check the battery status of all his devices beforehand. He is happy with the features of the app.
